BOOK NOTICE

The Cicindelidae of Canada, by J. B. Wallis. University of Toronto Press, Front Campus, University of Toronto, Toronto 5; 100 pages, 6 x 9 inches, 4 colour plates, halftones, maps, \$5.00.

The bright colours and fascinating ways of this small but important group of insects attract immediate attention. Cicindelidae, or tiger beetles, are frequently encountered, but they are difficult to capture, since they are alert and elusive, and still more difficult to identify. This intensive study of the distinguishing characteristics, geographical distribution and variation, and habits and habitats of tiger beetles in Canada—the culmination of the author's main interest for many years—will provide a

much-needed reference work. Studies of insect families are scarce, and professional and amateur entomologists alike will find this book a most useful aid in their investigations and a stimulus to further research.

J. B. Wallis, one of Canada's most distinguished amateur entomologists, is an honorary member of the Entomological Society of Manitoba and was one of the founders of the Natural History Society of Manitoba, which awarded him its medal for outstanding work in entomology.

The note above was received from the University of Toronto Press in September. We are pleased to draw the attention of our members to this important new Canadian work.
