INTRODUCTION

This checklist supercedes that of Thorn (1967). The new list of 433 species and 2 sub-species more than doubles the number in the earlier list, and, given the province's diversity of habitats, is expected to continue growing for some time.

We have tried to make the list useful and accurate by including only species for which specimens have been examined by competent specialists and, preferably, species for which voucher specimens can be located.

Contributions of the three authors of this work were approximately as follows: R. West assembled the original list in partial fulfillment of a Bachelor's degree at the University of Victoria. C. D. Dondale added species that were represented in the C.N.C. but were not previously reported. R. A. Ring proposed the project, made the University of Victoria collection available, and supported the completion and publication of the work. Persons who contributed substantially to the collecting and curating associated with the list include R. A. and S. G. Cannings, W. D. Charles, and A. L. Turnbull. E. Thorn helped with the literature, and L. Clatworthy typed the several drafts of the list.

Families of Spiders in British Columbia

- Order Araneae
 - Suborder Opisthothelae
 - Infraorder Mygalomorphae
 - Antrodiaetidae
 - Infraorder Araneomorphae
 - Uloboridae
 - Dictynidae
 - Amaurobiidae
 - Loxoscelidae
 - Telemidae
 - Dysderidae
 - Pholcidae
 - Theridiidae
 - Linyphiidae
 - Erigonidae
 - Araneidae
 - Tetragnathidae
 - Agelenidae
 - Hahniidae

- Mimetidae
- Pisauridae
- Lycosidae
- Oxyopidae
- Gnaphosidae
- Clubionidae
- Anyphaenidae
- Thomisidae
- Philodromidae
- Salticidae
